导师手册 Mentor Handbook

Digital Learning 数字化学习 2026–27 · 第一学期 Semester 1

· v1 · 2026-08-30 · _xiaobai · Project-level file · **outside**
the public repo, never sent to students · v1 · 2026-08-30

2026-08-31 起，这本手册有了一个公开的简化版：`course-site/for-mentors.html`（网站上的「导师工作说明 How this course is mentored」）。那一版是给所有人读的——学生、家长、公开学习者、别的老师、将来的导师；它保留了全部脚本与全部边界，删去了给教师本人的内容（开课前要补的空、M2 归档位置、篇幅性的评注）。第 6 节「信息控制」没有进公开版：公开地写出“哪些词不能说”，等于把它说了。第 6 节的具体内容已另立一页私密附录 `mentor/DISCLOSURE-ANNEX.md`，由段玉佩老师用邮件发给两位导师。这份完整手册仍是内部的权威版本；改动请以这一份为准，再决定是否同步到公开版。 **From 2026-08-31 this handbook has a public simplified version:** `course-site/for-mentors.html`. It keeps every script and every boundary, drops the instructor-facing parts, and **omits §6 (Disclosure control)** — publishing the list of withheld words would leak them. §6’s specifics now live in the private one-page annex `mentor/DISCLOSURE-ANNEX.md`, emailed to mentors by the instructor. This full file remains the internal authority.

o. 怎么用这本手册 How to use this handbook

This handbook covers what stays the same all semester: your weekly routine, how to score, how to write feedback, when to escalate. Module-specific calls live in each module’s own two files.

What you need		Where it is
boundaries	The routine, the rubric, the	This handbook
	Per-row points, per-case calls	mentor/s1-< >/scoring-sheet.md
	Openers and per-level wording	mentor/s1-< >/feedback-bank.md
	The rubric the student sees	rubric.html the module’s own rubric page — the same one you score from
Builder name, tracking-sheet URL, calendar, your email		The welcome letter

1 2 3 5 6 7 9 **How to read it:** read §1, §2, §3, §5, §6 before launch; §7 is a lookup, not a reading; keep §9’s table where you can see it.

1. 这门课是什么、你在其中是谁 The course, and who you are in it

1.1 一页看懂这门课 The course on one page

What it is	A public, free, fully asynchronous self-study course published as web pages. No class meetings, no forum, no groups.
Who takes it	60 9–12 30 About 60 enrolled high-school students in two groups of ~30, one mentor each; plus any number of open learners following at their own pace.
How long	16 M0 → B1–B6 → M1–M5 Two semesters of 16 teaching weeks.
Weekly load	≤ 2 Students: ≤ 2 hours a week, external course included.
Rhythm	→ Pages open Monday → publish to your own website by Sunday → register the link.
= Submission	No files are handed in: students publish on their own site and register the URL. You open the link — that is the submission.
Points	100 B1–B6 5 30 · M1 10 · M2 10 · M3 15 · M4 15 · M5 20 ≥60 ≥85 Semester total 100; ≥60 passes, ≥85 with distinction.
Late work	” ” No late penalty and nothing closes; only the portfolio has a closing date, and lateness there only delays the certificate.
Certificates	Issued by the instructor. Mentors never make or issue certificates.

1.2 你的工作，一句话 Your job, in one sentence

30

Every week: open your 30 students’ websites, score by the rubric, send each one a specific, actionable feedback email within a week — and contact anyone missing that same week.

1.3 为什么叫”导师”，不叫”老师”，也不叫”助教” Why “mentor”

mentor

The course says **mentor** everywhere. Please use only that word with students and parents. Three reasons, each of which changes what you do:

Not this	This	What changes
Not a teacher	— — You do not teach the content; the pages do, completely enough for someone with no teacher.	” ” Point back to the page — which micro-lesson, which card — instead of re-teaching.
Not a TA	30 You are not the instructor’s extra pair of hands; you are the one person these 30 students reliably meet.	” ” Every reply must show you read that student’s own words.
Not an enforcer	No late penalty, no chasing; when someone falls behind you check for obstacles, not compliance.	“ ” — — ” ” Always “did something get in the way?”, never “please submit ASAP”.

— —

A metaphor: in a fully asynchronous course you are the light that comes on at the same hour every week — students may not need you weekly, but they need to know it will be on. Where the metaphor breaks down: a light only illuminates, it does not judge, and you do score. So every reply goes *person first, score third*.

1.4 公开学习者不归你管 Open learners are not your responsibility

” ” Plainly: **open learners are not yours**. They do not register links, do not submit, do not receive your feedback, and are not scored by you. They self-score with the same rubrics and print their own completion statement.

• →

- If an open learner writes: reply kindly that the pages are complete and self-sufficient, mentors support enrolled students only, and point them to the page FAQ. No apology, no extra tutoring.
 -
 - Only enrolled student numbers appear on your tracking sheet; a record with no number is a mis-filed row first, a question for the instructor second.
-

2. 每周例行 The weekly routine

2.1 一周的样子 The week, Monday to Sunday

When	What you do	Time
Mon	① " " ② 30 ③ ④ §4.5 Open the tracking sheet, filter this week's task code, list who is missing, check your spam folder, and email every missing student the same day .	20–30 min
– Tue–Fri	→ → → → → One student at a time: open the link → privacy sweep first → read what this week's rubric asks for → read the three-line log → set the level, record the score → write the reply from the phrase bank → fill in the columns.	8 ≈ 8 min each
Thu	– – One gentle second touch: check for obstacles, do not chase.	10 min
Sun	§2.4 Report the four standing items to the instructor.	20 min
By next Mon	All replies sent.	–

“ ” **24–48**
Feedback within a week of registering; email questions within 24–48 hours (holidays excepted). Two different promises — don't merge them.

2.2 每位学生的 8 分钟，花在哪 Where the eight minutes go

Step	Min	Note
+ Open + privacy sweep	1.5	Always before scoring.
asks Read what the rubric	3	Only what the rows name. Do not read the whole site.
Read the three-line log	1	2 " " Line 2 is next week's to-do list.
Level, score, columns	1	Record it now, not later.
Write the reply	1.5	Start from the phrase bank, then make it theirs.

2.3 怎么守住 4–5 小时 How to protect the four-to-five hours

- 4–530 × 8 +
- The budget is 4–5 hours a week. Three things eat it: reading whole sites, writing replies from a blank page, and sinking into one student. Countermeasures:
1.

— —

Read only what the rubric names.
2.

" → → "

Always start from the phrase bank: it guarantees the three-part shape.
3.

15

If one student passes 15 minutes, stop, log it for Sunday, move on.
4.

3025

Spread it over two or three evenings; the 25th reply shows its fatigue.
5.

15125–76168

514105Week 15 (~6 h), Week 16 (~5 h)

and Week 14 (~5 h) are the heavy ones — plan them across three days in advance.
6.

— —

The third time you explain the same thing, it belongs in Sunday's report, not in another email.

2.4 周日汇报固定四项 The four standing items you report on Sunday

- Whatever the week, report these four to the instructor in a few sentences by email:
1.

/

Who registered, who did not, and who you have reached.

2. Privacy reminders sent, and whether they were fixed.
3. §8 — — This week's compiled data, if the week has any (see §8).
4. → Two or three shared sticking points — the signal that a page needs fixing.

§10 Two things never wait for

Sunday: suspected integrity issues, and any safety or privacy incident (§10).

3. 怎么用量规 How to score

3.1 四个等级 The four levels

Every graded task page carries a rubric. **Its rows are that module's learning objectives, verbatim.** You and the student read the same table.

Level	What it means	The question you ask
Meets	The row's requirements are all present, and they are this student's own.	Can I point at each thing the objective names?
Developing	Present, but one part is missing or too generic to belong to anyone.	Which one is missing? Name it in the reply.
Not yet	The work exists, but this row's substance is essentially absent.	What is the smallest next step? Give it.
No evidence	You cannot see the work: unpublished, broken link, not their own, or against the recording rules.	" " " " This means "I can't see it", never "it's bad".

“ ” ” ” 0 ”
 ” ” ” They often carry the same points but never the same sentence: “your report is there, this piece is missing” versus “I can't open it”.

3.2 分数从哪里来，不从哪里来 Where points come from — and don't

5 3 + 2 15 4 + 5 + 6

Points come only from rubric rows: a 5-point module is two rows (3 + 2), a 15-point module is three. The per-row split is in the module's scoring sheet.

” ” ” ”

The following are **gates, not points**. A gate is open or shut: deal with it first, then score. Passing a gate earns nothing; hitting one costs nothing.

Gate	What to do when it's shut	Deduction?
Published	" " Treat as a technical fault first; score after it's fixed.	No, and not late
Registered	→ " " The sheet only tells you where the work is. A missing entry is never "no evidence".	No
Privacy	✓ See §7.3.	No
A real password visible	§7.4 → → →	No
Late	Note the date and score normally.	No
Voluntary items	✓ — — Never chase; tick if it arrives, do nothing if it doesn't.	No
AI The AI use note	AI " " Semi-gate: cap at Developing per the module sheet, ask for the note, re-score once it arrives.	Per module

— — " " A metaphor: form requirements are the door, rubric rows are the goods inside. Where it breaks: a real door shuts you out until next time, while this one can be pushed open again at any moment — students may fix and be re-scored whenever they do. Put "I'll re-score whenever you fix it" in every Developing reply.

3.3 全课程的一条规矩：诚实路线同样满分 The course-wide rule: the honest route also earns full marks

This is the course's single most important scoring rule, confirmed by the instructor in five modules:

3.4 三个边界判断，走一遍 Three borderline calls, worked through

1 • B3 “ “ Two students who “found nothing”

	Student A	Student B
What they wrote	“ science — — , , ” not rocket , , ”	“ ”
Level	3 Meets, full marks	2 Developing
Why	“ ” The tools, the process and the closest suspect are all present; “the tool got it right” is a fact he verified.	— — No tool, no process, no specific words — not honesty, but an absence of checking.
What you write	“ ” Praise the honesty; never nudge him to “find some next time”.	“ — ” Give the formula and offer to re-score.

“ ” “ ” The line is not “did they find something” but “can I see the checking happen”.

2 • B6 “ “ A checklist that says “I’m good at all six”

- “ ” Six rows, all reading “got it”, perfectly formatted, nothing missing.
- ① 1 — — “ ” Not yet, per the scoring sheet: no stocktaking is visible.
 - “ ” “ ” “ ” “ ” “ ” “ ” It only looks like punishing confidence: the row asks for a stocktake, not a claim of mastery, and six identical “got it”s carry as much information as a blank sheet.
 - “ , + , 16 ”
 - Give a route, not an accusation: pick two rows, write the truth, “still shaky + one reason”; this list is your own map in Week 16; I’ll re-score whenever you update it.
 - ”B3 — — “ ”B3 — — “ ” By contrast, “still shaky, I keep forgetting to back-translate” and “solid, three cards in one pass last week” score the same.

3 • M3 A student who never once followed the plan

“ 4 “ “Four slots on the calendar, I used none. Wednesday went to physics homework, Saturday I overslept. I moved Wednesday to Friday evening, because nothing is

due Saturday.” The new screenshot shows the calendar actually changed.

- ③ 6 Meets, full marks.
- ” + ”
The row scores honest recording and a justified adjustment; the number of sessions completed is not a criterion. His reason names real events and the change reached the calendar.
- 0 ” ” — — The common misjudgement is to mark him down for zero sessions. Resist it: mark this down and the next student starts inventing session counts.
- 4 ” 2 ” — —
“ 2 ” The 4-point case is different: the obstacle was content (“I don’t understand lesson 2”) and the fix was scheduling. Name the mismatch.

3.5 三条容易记反的口径 Three things people get backwards

1. ” ” — —
§7.8 Clumsy is fine; *too fluent* is what triggers a check.
2. 🚫 — — Independent tasks score engagement and correctness of form — never style, English level, taste, or opinion.
3. ” ” ” A parent sitting alongside is not doing the work; the test is whose words these are.

4. 怎么写反馈 How to write feedback

4.1 一封回信的形状 The shape of a reply

Every module's phrase bank has the same shape:

① 我看到了什么（具体，最好引用学生自己的一句原话）→ ② 为什么是这个等级 → ③ 一个下一步。 ① **What I saw (specific — quote their own words)** → ② **why this level** → ③ **one next step.**

- 3–5 B1–B6 4–6 ” ” — —
- Length: 3–5 sentences; 4–6 in B1–B6, where your reply doubles as a model email — write it with all six parts present.
- 15 ” ”“ ”
- Language: a 15-year-old must be able to act on it. No “consider deepening your analysis”.
- “ ”“ ”
- Exactly one next step, with a sense of scale: “five minutes”, “ten minutes”.
- ” ”
- Close every non-full-marks reply with “I’ll re-score whenever you fix it”.

B1–B6

The six Basics weeks have a fixed four-part

anatomy, spelled out in each scoring sheet:

① + → ② → ③ ①/3 + ②/2 = /5 + → ④
① **Their pseudonym + one specific thing they did** → ② **the privacy result (say it even when clean)** → ③ **the score and one suggestion** → ④ **one line about next week.**

“ ” “ ”
Never skip the clean privacy result: for a student's first public page, “I checked, you're fine” is the sentence they need.

4.2 通用句式库 A general phrase bank

mentor/s1-< >/feedback-bank.md — —

Each module has its own bank — **use that first**; these are the cross-module ones.

•	Openers -	_____	_____	/	_____	_____	/	_____	_____
” “		_____	_____		_____	_____		_____	_____
_____		_____	_____		_____	_____		_____	_____
	Privacy result -	_____	_____		_____	_____		_____	_____
		_____	_____		_____	_____		_____	_____
	Naming the level -	_____	_____	_____	_____	_____		_____	_____
		_____	_____	_____	_____	_____		_____	_____
		_____	_____	_____	_____	_____		_____	_____
	The next step -	_____	_____	_____	_____	_____		_____	_____
		_____	_____	_____	_____	_____		_____	_____
	Missing registration -	_____	_____	_____	_____	_____		_____	_____
		_____	_____	_____	_____	_____		_____	_____
	Late -	_____	_____	_____	_____	_____		_____	_____
		_____	_____	_____	_____	_____		_____	_____
	Closers -	_____	_____	_____	_____	_____		_____	15

4.3 三个不要 Three things a reply never does

1. _____ Never hand over a model answer to
copy; point at the formula.
2. _____ \$10 _____ Family, feelings and
private matters are read, never commented on.
3. _____ ” _____ ” “ _____ ” _____ “
” _____ Never referee for them: give the criteria and a question, not the verdict.

4.4 让学生看见”我真的读了” Showing you actually read it

” ” There is no forum and no peer review: you are the only reader. So every reply quotes at least one of their own sentences. That single quote outperforms any amount of praise.

4.5 两封模板信 Two template emails

A • **Monday, missing registration**

主题：第 ____ 周 · 只是确认一下 ____（化名）你好，第 ____ 周的登记表上我还没看到你的链接。这不是催交——这门课没有迟交处罚，我只是想确认没有什么东西卡住你：网站打不开？平台登不进去？还是这周实在太忙？回我一句话就行，哪怕是“这周没时间”。需要的话，我们可以约 15 分钟视频。本周页面在这里：____ Subject: Week ____ · just checking. I haven't seen your link yet. **This is not a chase** — there's no late penalty. I just want to know nothing is blocking you: site won't open? can't log in? busy week? One line back is enough, even “no time this week.”

B ·

The scored reply, skeleton

主题：第 ____ 周反馈 · ____（化名）① ____（化名）你好！你的_我读了——“____”这一处_。② 隐私检查我做过了——____。③ 本周得分：①/_ + ②/_ = /5。_（一条建议 + 随时补评）。④ 下周_。有问题随时邮件我。____（你的署名）

5. 不做什么 What you must not do

Hard boundaries. Each traces to a course document, and each is doable on a Tuesday evening.

Never	What it means	Do this instead
Never do the work		” + ” Point at the micro- lesson and the formula; teach the screenshot-plus-three-sentences ask.
Never judge a family	”	” ” “ ” Hold the course’s rule only; the rest is theirs.
Never touch a password	” ”	B4 — — “ ” You are the live demonstration of the lesson.
Never endorse a course		” ” ” ” “ ” Help with <i>how</i> to learn, never with that course’s content.
Never chase a voluntary item	2026-08-30 §9	✓ Tick it if it comes; otherwise do nothing and say nothing.
Late is never a deduction	” ”	Note the date; score and reply as normal.
Never comment on self-check content	— —	” ” — — “ ”
Never be the answer key		” ” — —
Never issue certificates		“ ”
Never preview Semester 2	§6	§6
Four questions you never answer alone		§10

6. 信息控制 Disclosure control

6.1 规矩 The rule

4 Before Semester 2 Week 4, none of the following appears in anything you write to a student or a parent:

Never appears	Note
AI	8 — — The instructor's AI-learning framework's name and its phase names. You are deliberately not given them: what you don't know, you can't leak.
" AI "	The "try it yourself first, then ask AI" framing in any wording.
"AI " / "AI literacy"	— — Both surveys are called "learning self-checks" to students.
AI AI	AI M4 " AI " No AI tool is ever recommended as a learning tool.
	The instructor's personal site is not linked in Semester 1.
	Anything beyond the four lines already in the family letter goes to the instructor.

6.2 为什么 Why — one line

— — Because the two self-checks compare the same people before and after the same teaching; if students meet Semester 2's vocabulary and method before the first check, the change can no longer be attributed to the teaching, and the comparison is void.

It is not secrecy, it is sequencing: all of it goes public in Semester 2.

6.3 学生问起来，就用这些话 The exact words to use

If a student asks	You say
"AI"	"AI" 
"AI"	"AI" 
"AI"	"AI"
"AI"	"AI"
"AI"	"AI"
"AI"	"AI"
"AI"	"AI"

6.4 万一说漏了 If you slip

Don't panic and don't delete anything. Email the instructor the same day: to whom, and which sentence. The instructor decides whether it matters. Concealing it is far worse than saying it.

7. 常见情况与应答 Common situations, with scripts

→

→

Each: how to read it → what to do → a sentence you can paste.

7.1 链接打不开 A link that won't open

”

”

”

”

”

”

”

”

Read it as a technical fault, not a missing submission. Reply the same day with a screenshot of what you see; the usual cause is a page edited but not re-published. Score after it's fixed; not late. Only after a week does it become “no evidence”.

“链接我这边打不开（截图附上）。最常见的原因是改完没有再点一次‘发布’——去编辑器里再点一次试试？还不行就把你看到的画面截图发我。修好随时告诉我，不算迟交。”

7.2 网站坏了、内容丢了 A site that broke or lost content

--

B6

+

”

”

→

Ask them **not to rebuild yet**: screenshot first. Recover from the backup B6 taught them to keep. Anything unrecoverable may be replaced by a screenshot plus “original page lost” and scores normally. Several students in one week → tell the instructor the same day; it may be the platform.

“先别急着重建——先把你看到的画面截一张图发我。第7周教过的那份备份还在吗？找回来的部分照常评分；实在找不回的，用截图加一句‘原页面已失效’顶上就好，这一行的分不受影响。”

7.3 学生发布了真名、正脸照片或学校全名 A real name, face photo or full school name

Same-day, ahead of all scoring.

“打不开不是你的问题——每段视频页面上都有完整的文字版，只看文字版完全能学完这一节，分数一样。方便的话告诉我是哪一段、用的什么网络，我这周报给段老师换片源。谢谢你帮全班踩了路。”

§8.2 Courses that won't open have their own loop — §8.2.

7.6 学生落后两周或更多 Two or more weeks behind

” — 1. “ 2. “ 3. 4. 15 — 5. §10 6. ”“

Do the subtraction first: current week first, backlog after — that is the course’s own line to students. Ask one open question. Give a single minimum step. Offer 15 minutes of video. From the second Monday, report to the instructor. Never mention points, certificates, or consequences.

“第__周了，我还没在登记表上见到你——先说清楚：这门课没有迟交处罚，什么都没有关闭。建议这样：先做本周的，落下的以后在缓冲周补，不用从头爬。落下的那几周里最要紧的其实只有一件：_____。是网站的问题、时间的问题，还是别的什么？回我一句就行。想约 15 分钟视频聊聊也随时可以。”

7.7 “我没有电脑 / 没有邮箱 / 账号是我爸妈管的” “No computer / no email / my parents manage my accounts”

A conditions problem, never an attitude problem, and never your moment to judge a household. The course has a route for each.

Situation	The route	What you say
Phone only	B2 B6 ”	“ — — 3 7 ”

1. “ . ”
2. — —
3. “ + 3 + U ” →
4. →

Thank the student, don’t ask why. Find the alternative: the menu marks which courses need sign-up; the cloud-drive fallback (email-to-self + local folder + USB) scores the same as a cloud drive; most tool categories have a no-sign-up option. **Only the website builder has no substitute** — escalate that to the instructor at once. If a parent writes directly, acknowledge warmly and pass policy questions to the instructor.

“谢谢你告诉我，家里的决定我们完全尊重。_____这一项有别的路：_____。换了路线分数完全一样，课程本来就写了这一条。”

7.10 学生把自己锁在门外了 Locked out of an account

→

Walk them through the forgot-password route. Never ask for any credential. When it’s resolved, tell them explicitly that nothing was deducted.

7.11 学生写下明显的困扰 A student discloses distress

§10 Read, don’t comment, don’t probe, don’t promise confidentiality, don’t counsel. Same day to the instructor: their exact words and where they appeared, with none of your inference.

8. 你要汇总的三件事 The three things you compile

Three compilations the course design explicitly assigns to mentors. Each is small; each has something downstream waiting for it.

8.1 「同学们的工具推荐」 The cohort’s tool picks

When	141416 Compile in Week 14, send within a week; top up with the optional recordings in Week 16.
Source	M4”M52”
Format	. . . 1
Three rules	①②③ ”” Pseudonyms only; no scores or rankings; quote verbatim; opt-outs are honoured silently.
Who merges	Each mentor makes one; the instructor merges.
Why	”” 2026-08-30 It is how “you are writing for your classmates” becomes true in a course with no forum — an annual commitment, not a one-off.

8.2 「打不开」的外部课程名单 The “wouldn’t open” reports

When	4B36B5 Weeks 4 and 6 mainly, then whenever it comes up; report every Sunday.
What to record	/ . / / / . / /

Downstream	” ” — — The instructor’s own access-testing list; the menu’s twelve courses are all still marked “to be tested”.
To the student	/ “ ”

8.3 「还不稳」清单 The “still shaky” tally

When	7 B6 16 Collected in Week 7, delivered to the instructor before Week 16.
What to record	B6 ” ” ” ” 30 Which of the six Basics each student marks as shaky, and which one the most students mark.
Downstream	16 It is the semester’s most direct teaching signal.
Note	” ” For the instructor only; never told back to an individual student.

8.4 另外两笔一次性的汇总 Two one-off collections

the welcome letter:	— — Not routine, but required in the first year; both feed
3 B2 Shared sticking points on the website builder. 5 B4 ” ” Where students looked for two-factor authentication and didn’t find it.	— —

--	--

9. 学期节奏 The semester at a glance

Relative

weeks only. Actual dates live on the per-year calendar page; none of them falls on a public holiday.

Wk	Module	/ What lands	What you score	Special
W1	M0	-- Nothing	No points	Confirm everyone has the welcome letter
W2	B1	= The email itself	① 3 + ② 2 = 5	✓ Your reply is a welcome letter first; baseline self-check
W3	B2	-- The website link; the tracking sheet starts	① 3 + ② 2 = 5	The privacy sweep is the week's real job
—	Buffer W3–W5			No new module; your rhythm rolls too
W4	B3	+ + + +	① 3 + ② 2 = 5	\$8.2 =
W5	B4	+ +	① 3 + ② 2 = 5	\$7.4 ” ” \$8.4
W6	B5	+ +	① 3 + ② 2 = 5	40
W7	B6	1 + +	① 3 + ② 2 = 5	\$8.3 30 --
W8–9	M1	/ + ” ”	② 4 W8 + ① 3 + ③ 3 W9 = 10	AI 

Wk	Module	/ What lands	What you score	Special
W10	M2		① 3 + ② 4 + ③ 3 = 10	② → ”
W11–12	M3	SMART + +	① 5 + ② 4 + ③ 6 = 15	W11 ① ② W12 1 ” ”
W13–14	M4	+ + +	① 4 + ② 5 + ③ 6 = 15	W13 W14 + \$8.1 10
W15–16	M5	v1 5–7 + +	① 6 + ② 6 W15 + ③ 8 W16 = 20	W15 12 ③ ” ”
After	Close-out	—	—	/100 → ≥85 / ≥60 / <60 → + + +

10. 升级给教师 When to escalate

— — To the instructor. When in doubt, escalate: over-reporting costs nothing, sitting on it does.

Situation	How fast	What you send
Distress, self-harm, bullying	Same day	/ Their exact words and where. No inference, no promise of confidentiality.
A credential exposed	Same day	
Privacy exposure unfixed after a week		
Integrity	Same week	The determination is not yours.
Unreachable for two weeks		
Anything from a parent	Same day	
Anything about the study	Same day	
Accommodations	Same week	
A grade dispute	Same week	+
Shared technical failure	Same day	
The same sticking point, third time	Sunday	— —
/ Builder unusable	Same day	3

” ”

Not escalations: lateness, low scores, an empty log, “no time this week”, a fallback route, or a course choice you’d not have made. All of these are the design working as intended.

11. 开课前要补的空 Blanks to fill before launch

Everywhere this handbook says “announced before launch” maps to one line below. Check them off with the instructor; each missing item is a week that stalls.

#	The blank	What stalls without it	Status
1	30/30 Mentor names, emails, roster split	2 B1 “ ”	Waiting
2	Student numbers	“ ” “ ” 1	Waiting
3	Tracking-sheet URL	3 “ ”	Spec settled; the form and URL are not
4	+ + / / The builder and its three switches	3 5 4 7	Wix Weebly Order settled, mainland test pending
5	The calendar	\$9 15–16 “ ”	Waiting
6	How the 1:1 video session is booked	7 \$7.6	Missing from the letter
7	“ ” How you record an off-menu confirmation	7 B6 11 M3	Missing from the letter
8	The official self-check items	2 16	_wukong Delegated, not final
9	+ Consent form and accessibility statement	M0 3 4	Missing
10	The anonymous end-of-semester survey link	16	Waiting

#	The blank	What stalls without it	Status
11	The welcome letter	1-10 1 ” ”	mentor/welcome-letter-spec.md Spec built; the letter is the instructor's to write

mentor/s1-< >/

M2

course-site/s1/m2-what-is-digital-learning/mentor/

mentor/

.gitignore

10

M2

mentor/s1-m2-what-is-digital-learning/

One filing inconsistency: eleven modules' mentor files live in `mentor/s1-<module>/`, but **M2's pair lives under `course-site/s1/m2-.../mentor/`**. Neither location is published (`mentor/` is gitignored), but in Week 10 a mentor will look in the first place and not find them. Move M2's pair before launch.
